- 5. Swiss Healthcare Case Study**
- 6. Tools & Cheat Sheets**

1. What is GEO?

GEO = Getting AI engines to mention and cite your business in their answers.

- Traditional SEO = rank #1 on Google blue links.
- GEO = appear inside ChatGPT's answer when someone asks "best plumber in Zurich."
- AI answers cite only 2-3 sources. Being one of them is worth more than ranking #1 on Google.

How it works (simple version):

- User asks a question → AI searches the web → finds chunks of text → picks the best ones → builds an answer → cites sources.
- GEO makes sure **your text chunks** are the ones that get picked.

Key numbers:

- 45% of Google searches now show AI answers.
- Only 12% of AI-cited pages rank in Google's top 10.
- Adding statistics to your page increases AI citations by 30-40%.

2. The 4 AI Engines: What They Cite

Table 1 The 4 Engines at a Glance

Engine	Backend	Top Source	Cites per Answer	What Wins
ChatGPT	Bing Index	Wikipedia (16%)	~8	Fast pages, brand homepages, authority sites
Perplexity	Own index (200B+ URLs)	Reddit (47%)	~22	Reviews, comparisons, community content
Gemini	Google Index	LinkedIn (14%)	~13	Traditional SEO + structured data
Claude	Brave Search	NYT/Atlantic (15%)	~6	Premium journalism, 2-4 week old content

3. What GEO Agencies Actually Do

Figure 1: Each engine pulls from different sources. ChatGPT loves Wikipedia. Perplexity loves Reddit. Claude loves premium news.

3. What GEO Agencies Actually Do

3.1 The 4 Leading Platforms

Table 2 Platform Comparison

Platform	What It Does	Best For	Price
HeyLead.ai	Swiss platform. 9 AI agents create 100-400 pages, monitor crawlers, build KI-Feed. Leads in 90-150 days.	DACH businesses wanting done-for-you	Custom (CHF)
Profound	Enterprise. 1.3B+ real prompts, CDN crawler tracking, content creation with 16 AI models.	Large brands (Airbnb, Uber, LinkedIn)	\$99-399/mo
Otterly.ai	Monitors all 7 AI engines. 20+ factor GEO audit, competitor benchmarking, sentiment tracking.	Agencies managing multiple clients	\$29-189/mo
Peec AI	Tracks citations across 6 engines. Distinguishes "used" vs "cited." G2 rating 4.9/5.	Brands wanting citation analytics	\$150-800/mo

Figure 2: HeyLead leads in content workflow + Swiss focus. Profound dominates in data volume.

3.2 The 7 Things Agencies Actually Do

Every GEO agency, whether HeyLead or Profound, does these 7 things:

1. **Entity Setup** — Create a Wikidata entry, Google Knowledge Graph presence, and Organization schema with sameAs links.
2. **Structured Data** — Add FAQPage, LocalBusiness, HowTo schema. FAQPage alone increases AI citations by 3.2x.
3. **Answer-First Content** — Rewrite pages to lead with facts, not fluff. Every paragraph must contain a citable fact.
4. **Citation Seeding** — Get brand mentions on Reddit, Quora, industry blogs, directories, and news sites.
5. **Digital PR** — Publish original research, guest posts, and expert commentary to earn authoritative mentions.
6. **Crawler Management** — Configure robots.txt for 10 AI bots, deploy llms.txt, monitor bot visits.
7. **Monitoring** — Track citations across 4 engines daily, measure Share of Voice, flag hallucinations.

3.3 The GEO Audit (8 Steps)

3. Run prompts on ChatGPT, Perplexity, Gemini, Claude.
4. Score 7 dimensions: citation rate, mention rate, SoV, sentiment, source authority, hallucination rate, position vs competitors.
5. Flag hallucinations: every false fact the AI says about your brand.
6. Benchmark competitors: run the same prompts for 3-5 rivals.
7. Prioritize actions: rank by expected impact vs effort.
8. Schedule re-audit: monthly for active campaigns.

Figure 3: Before vs after 90 days of GEO. Every dimension improves dramatically.

3.4 AI Crawler Management (Copy-Paste Ready)

Add this to your robots.txt:

4. Your 90-Day Action Plan

Figure 3: 10 parallel workstreams across 3 phases. Foundation → Content → Scale.

Days 0-30: Foundation

- Create Wikidata entry. Get your QID.
- Complete Google Business Profile (every field).
- Add Organization + LocalBusiness + FAQPage schema.
- Deploy robots.txt and llms.txt.
- Audit: run baseline prompts, score current visibility.

Days 30-60: Content + Authority

- Rewrite top 10 pages: answer-first, fact-heavy, specific data.
- Create FAQ page with 20+ questions + FAQPage schema.
- Build multilingual content (German, French, Italian).
- Get 3+ external mentions (guest posts, directories, interviews).
- Publish one original research piece (survey, data study).

Days 60-90: Scale + Monitor

- Set up daily monitoring across 4 engines.

- Compare Day 90 vs Day 1 results.
- Refresh content quarterly.
- Track competitor moves. Respond within one week.
- Document everything as SOPs for your team.

5. Swiss Healthcare Case Study

Goal: Make "Alterszentrum Bern-Mittelland" the top citation when someone asks "Bestes Alterszentrum fuer Senioren in Bern" on ChatGPT, Perplexity, Gemini, or Claude.

What We Do (12 Steps)

1. **Entity Home:** Build an "About" page opening with: "Alterszentrum Bern-Mittelland is a non-profit senior care facility in Bern, Switzerland, providing 24-hour nursing care, dementia support, and rehabilitation for 120 residents since 1987."
2. **Wikidata:** Create entry with QID, name (DE + FR), founding date, address, website, LinkedIn, Curaviva profile.
3. **Schema Markup:** Add Organization + LocalBusiness + FAQPage + HowTo schema. Validate with Google's Rich Results Test.
4. **Google Business Profile:** Complete every field. Add 12 photos. Post weekly updates. Respond to all reviews within 24h.
5. **Directories:** List on Curaviva, local.ch, search.ch, guidle.com, medregom.admin.ch.
6. **Content Rewrite:** Rewrite services page with answer-first structure, staff-to-resident ratios, insurance details, specific equipment.
7. **FAQ Page:** 20 questions organized by: Services, Costs, Admission, Dementia Care, Visiting. Add FAQPage schema.
8. **Multilingual:** Create French versions of all key pages. Add hreflang tags.
9. **Digital PR:** Publish research: "State of Dementia Care in Canton Bern: 2026 Survey." Pitch to Berner Zeitung.
10. **Community:** Answer questions on r/Switzerland, Quora (senior care topics). Mention facility name in context.
11. **Monitoring:** Daily prompt testing in DE/FR/EN across 4 engines. Track citation rate, position, sentiment.
12. **Refresh:** Quarterly content updates. Monthly directory checks. Weekly competitor tracking.

Expected Results (90 Days)

Table 3 90-Day Targets

Metric	Day 0	Day 90
Citation rate (German queries)	0-5%	40-60%
Citation rate (French queries)	0%	20-30%
Share of Voice vs competitors	<5%	25-35%
Hallucination rate	Unknown	0%
Directory listings	2-3	8-10

6. Tools & Cheat Sheets

Schema.org JSON-LD Template (Copy-Paste)

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@type": "LocalBusiness",
  "@id": "https://yoursite.com/#business",
  "name": "Your Business Name",
  "url": "https://yoursite.com",
  "sameAs": [
    "https://www.wikidata.org/wiki/Q12345678",
    "https://www.linkedin.com/company/yourbrand",
    "https://www.crunchbase.com/organization/yourbrand"
  ],
  "description": "Clear 1-2 sentence definition.",
  "address": {
    "@type": "PostalAddress",
    "streetAddress": "Street 123",
    "addressLocality": "Bern",
    "postalCode": "3011",
    "addressCountry": "CH"
  },
  "geo": {
    "@type": "GeoCoordinates",
    "latitude": "46.9480",
    "longitude": "7.4474"
  }
}
</script>
```

Recommended Tool Stack

Table 4 Tools by Budget

Task	Free	Paid
Monitoring	Manual prompt testing	Otterly.ai (\$29-189/mo)
Citation tracking	Google Alerts	Peec AI (\$150-800/mo)
Schema validation	Google Rich Results Test	Schema App
Wikidata	Wikidata.org (free)	N/A
GEO audit	Otterly free trial	Profound (\$99-399/mo)
Content creation	ChatGPT/Claude	HeyLead.ai (custom)

Key Takeaways

- **GEO is not SEO.** SEO ranks pages. GEO gets you cited inside AI answers.
- **Start with entities.** Wikidata + Schema.org + sameAs links are the foundation.
- **Facts win.** Statistics, dates, specific numbers increase citations by 30-40%.
- **Every engine is different.** ChatGPT likes Wikipedia. Perplexity likes Reddit. Optimize for all four.
- **90 days is enough.** Foundation (30d) → Content (30d) → Monitor (30d). Leads flow by day 90-150.
